

Get Any Retail Display Window To Generate Revenue 24/7

Every once in awhile something comes along that is so **deceptively simple** *it automatically changes how we do things.*

The **uMote™** Hand Gesture Detection system from 3.D.S is an extremely reliable unpaid member of the staff that has revolutionized interactive displays for ever.

Your Hand become a smart interface used to control multi-media contents in ways never before imagined. With **uMote™**, YOU become the remote control. Simply moving your hand causes you to magically interact with the presentation.

uMote™ allows any potential client or visitor to interact with information in either private or public places in an entirely new way. Because the technology **does not require any physical contact** and is invisible to the naked eye, it initially creates a magical atmosphere that invariably attracts the crowd. The only visible element is the floating projected image on the display window or displayed on a flat screen.

uMote™ technology is suitable for almost any organization that aims to stimulate the curiosity of casual passers-by 24/7, encouraging them to enter or return to your retail environment without requiring any assistance. **uMote™** is therefore an attractive product that gives your customers an excellent ROI (Return On Investment).

uMote™ magically transforms any standard display window into a source of inspiration and fun.
